# Troubleshooting Tips

### CABLING

- Check that all cable connections are secure
- Test the HDMI cable by connecting directly with other equipment
- Test the adapter with a different port or computer, if possible

### COMPUTER SOURCE

- Check for updated OS and video graphics card drivers for Mini DisplayPort
- Review the troubleshooting steps from your computer manufacturer
- Try different video resolution and refresh settings supported by the connected display
- Verify that the audio from your computer is not muted or extremely low
- Reboot the computer after making multiple changes

### CONNECTED DISPLAY

- Select the HDMI input from the connected display menu
- Select a video resolution and aspect ratio setting supported by your computer
- Adjust the audio level with your remote or from the display menu
- Check for firmware updates and troubleshooting from the display manufacturer
- Check for firmware updates and troubleshooting from the display manufacturer
