**EDID Selection Notes:** Set the dip switches for the audio/video setting above. The Matrix should adjust to the new settings within a few seconds.

### 3.7 Troubleshooting Notes

- Check that the Matrix and all connected equipment have power. The power LED should be lit.
- Check that all cables are connected to the correct input and output ports.
- Use a short HDMI extension cable to connect a media streaming stick if the space is too tight.
- Check that the correct video input source and output display is selected. Check the green LED indicators on the front panel of the Matrix.
- All connected equipment must support HDCP to view protected content.
- Directly connect the video source to a display to test for compatibility.
- Check the audio output settings from the source device or computer.
- Test each HDMI cable by connecting it with other equipment.
- Recommended maximum total HDMI cable distance In/Out is 15/15ft (4K) and 25/25ft (HD).
- Connecting through an HDMI coupler or wall plate may degrade the signal transmission.
- Place the Matrix away from fluorescent lighting or equipment that generates electrical noise.
- A 'Not Supported' error message may indicate that the connected equipment does not support HDCP (or more than 2 outputs) for view content-protected video.
- Check that the IR window on the front panel is not blocked.
- Reboot the video source and output displays after making changes if the display is not detected.
