Warranty Information This product is backed by a limited one-year warranty. In addition, Cable Matters warrants its products against defects in materials and workmanship for the periods noted, following the initial date of purchase. During this period, the products may be returned for repair, or replaced with equivalent products at our discretion. The warranty covers parts and labor costs only. Cable Matters does not warrant its products from defects or damages arising from misuse, abuse, alteration, or normal wear and tear. Specifications are subject to change without notice.

FCC Compliance Statement This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: 1) This device must not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Limitation of Liability In no event shall Cable Matters Inc. (including their officers, directors, employees or agents) be liable for any damages (whether direct or indirect, special, punitive, incidental, consequential, or otherwise), loss of profits, loss of business, or any pecuniary loss, arising out of, or related to the use of this product exceeding the actual price paid for the product. Some states do not allow the exclusion or limitation of incidental or consequential damages. If such laws apply, the limitations or exclusions contained in this statement may not apply to you.

Active Mini-HDMI® to VGA Adapter with Audio Support

- 1) Connect the ADAPTER to the Mini-HDMI port of the HDMI source
- 2) Connect a VGA CABLE (sold separately) from the ADAPTER to the DISPLAY
- 3) Select the VGA input setting from the menu of the connected DISPLAY
- 4) Adjust the computer VIDEO resolution and refresh rate from the HDMI Source
- 5) Connect the AUDIO cable from the adapter to a speaker and configure the audio output

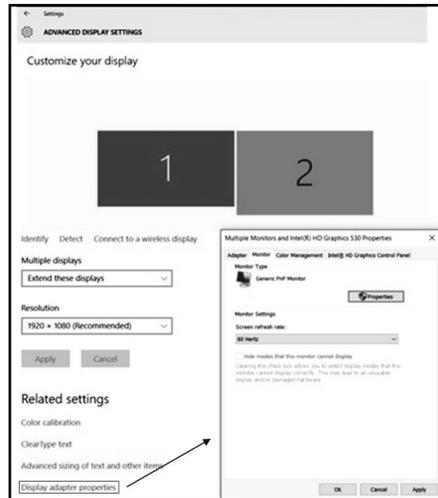

Connection Notes

- MINI-HDMI compatible with a mini-computer, tablet or video camera with a Mini-HDMI port
- NOT BI-DIRECTIONAL adapter converts the signal only from Mini-HDMI to VGA
- VIDEO RESOLUTION up to 1920x1080 @ 60 Hz to a display with VGA input
- COMPATIBLE VIDEO RESOLUTION is required from the Mini-HDMI source and VGA display
- SUPPORTED VIDEO RESOLUTIONS by the Mini-HDMI to VGA Adapter: 480i/480p/576i/576p/800x600/720i/720p/1280x1024/1600x1200/1080i/1808p
- AUDIO IS SUPPORTED with the included audio cable from the source to external speakers since audio is not carried over the analog VGA signal
- NO HDCP SUPPORT for viewing copy protected video from a DVD or other protected source
- OPTIONAL USB POWER port for tablets or other devices with low-power Mini-HDMI ports (Micro-USB cable and USB charger are sold separately)
- MINI-HDMI DEVICES such as a camera may require special configuration settings. Consult the manufacturer for technical support

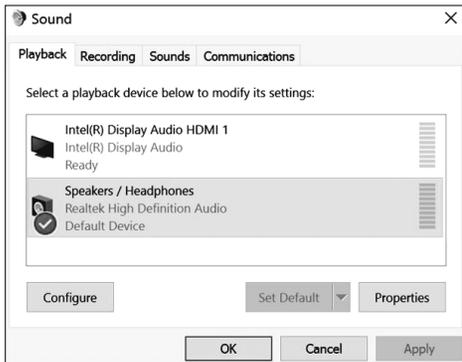

VIDEO SETTINGS IN WINDOWS

- 1) Connect the Adapter and the cable
- 2) Select the **HDMI input** from the connected display menu
- 3) Search for **Display Settings** in Windows
- 4) Select to **Duplicate** or **Extend** the display
(**Note:** Click and drag the program to the display in Extended Mode)
- 5) Click **Apply** to save the settings

Select **Display Adapter Properties** to adjust the video refresh rate

AUDIO SETTINGS IN WINDOWS

- 1) Search for **Sound** in Windows
- 2) Open the **Playback Tab** in **Sound**
- 3) Select the display with HDMI audio
- 4) Set the **Configuration** and **Properties**
- 5) Click **Set Default**
- 6) Click **Apply** and **OK** to save the settings
- 7) Adjust the volume at the connected display

- ◆ Changing the audio device may require you to **RESTART** your PC
- ◆ Check that your computer volume is not **MUTED** or extremely low

Troubleshooting Tips

NOTE: If you have a weak signal or no picture:

- 1) Power down all equipment
- 2) Connect a Micro-USB cable from the adapter power port to a power source
- 3) Connect the adapter to the HDMI source
- 4) Connect the VGA cable to the display
- 5) Power on the equipment

CABLING

- Check that all cable connections are secure
- Test the VGA cable by connecting directly with other equipment
- Test the adapter with a different port or Mini-HDMI source

Mini-HDMI SOURCE

- Review the configuration settings and troubleshooting steps from the device maker
- Verify that audio is not muted and that the correct output is selected
- Try different video resolution and refresh settings supported by the display
- Reboot the device after making multiple changes

CONNECTED DISPLAY

- Select the VGA input from the connected display menu
- Select a video resolution and refresh rate supported by both the Mini-HDMI source and the Adapter
- Check for firmware updates and troubleshooting from the display manufacturer
